

Join our campaign by sending this letter to potential funders

Using this letter is simple.

1. Copy the content below in the body of an email.
2. Send to: Helen.haines.mp@aph.gov.au; Jaclyn.Symes@parliament.vic.gov.au; Mary-anne.thomas@parliament.vic.gov.au; Shaun.leanne@parliament.vic.gov.au; lisa.neville@parliament.vic.gov.au; James.merlino@parliament.vic.gov.au; ros.spence@parliament.vic.gov.au; Martin.pakula@parliament.vic.gov.au; steph.ryan@parliament.vic.gov.au; Mark.gepp@parliament.vic.gov.au; Tania.maxwell@parliament.vic.gov.au; Wendy.lovell@parliament.vic.gov.au; Tim.quilty@parliament.vic.gov.au
3. Copy the content below and go to <https://www.pm.gov.au/contact-your-pm> to send to the Prime Minister, The Hon Anthony Albanese MP.

Dear potential funder,

I'm writing today to let you know I support Strathbogie Shire Council and the Greening Euroa Project's call for \$3.8 million in funding to make this important project a reality.

The Greening Euroa Project is an innovative community driven project that will use recycled water to irrigate public green spaces during the summer months.

The proposal is the first of its kind in Victoria. It's climate smart, cost efficient and community inspired.

For the Euroa township, the Greening Euroa Project will keep our school ovals, sporting fields and parks and gardens green in the dry summer months.

It will use recycled water to irrigate our public green spaces. Something we know is essential to our community's health and wellbeing during times of drought.

The Greening Euroa committee has spent the past three years developing the Greening Euroa plan that will tap into the excess water from the Euroa Wastewater Treatment Plan.

With the support of Goulburn Valley Water, this wastewater will then be safely upgraded from Class C to Class B, before being piped underground to storage tanks throughout the township.

The Greening Euroa Project is a win for everyone – community, children, and the environment.

I ask that you show your support by committing funding to make this ground-breaking project a reality.
